Bryan – We should definitely keep the meeting. I can provide an update the forms and training. R9 may want to mention its CA GDF and that process. R8 could give a status update of the situation with the U&O Reservation FIP and streamlined permitting. Chris

Hi Bryan,

It's hard to say about the call. On item #2, Region 8 has gotten very involved in that issue because of all their oil and gas activity. They have received various documents from companies to make the appropriate demonstration and they have even had meetings with industry and BLM/FWS together to clarify what's needed. They have made very good progress in narrowing/clarifying what we are looking for, but I don't know how relevant it is for other regions at this point.

Chris has led the way to get the supporting application forms revised for all the source categories so that needs to be mentioned too, either on a call or by email.

Thanks, Greg.

The following are the topics I got from the email addressees below. Do you think these are enough to have a call and/or should we go out with a request to everyone of the addressees of the Tribal minor NSR list to see what they provide? The only issue is that the call is scheduled for tomorrow at 2 pm eastern time and 11 am pacific. Let me know your thoughts as soon as possible. Thanks, Bryan.

1.Fillable PDF application/registration forms for the Indian Country Oil and Natural Gas True Minor Source FIP (Region 8 and HQ)

2. clarification of acceptable documentation to demonstrate prior ESA/NHPA review by another federal agency under the Indian Country Oil and Natural Gas True Minor Source FIP. (region 8 and HQ)

3. Just would like to have a regional take on how the early tribal consultation occurs and how they determine which tribes to notify early and which ones at the time of public notice especially for NHPA. (Region 6)
